### **Prince William Sound Salmon Fishery News Release #49**

**PRINCE WILLIAM SOUND SEINE FISHERIES:** An aerial survey of the Eastern District was flown yesterday. An aerial survey of the Southwestern, Montague and Southeastern districts is scheduled for later in the week. Wild stock pink and chum indices have been tracking with anticipated numbers during recent surveys.

VFDA has recommended standing down in Port Valdez to allow for the accumulation of pink salmon needed for broodstock and does not anticipate recommending a Port Valdez pink salmon clean up fishery at this time. VFDA began their pink salmon eggtakes at the Solomon Gulch Hatchery on Thursday, August 2.

PWSAC began its pink salmon cost recovery program at AFK, CCH, and WNH on Thursday, July 26. PWSAC completed its pink salmon cost recovery program on Friday, August 3.

**COGHILL DISTRICT:** The Coghill District, excluding waters of the WNH THA and SHA, will open to commercial drift gillnet and purse seine harvest for a **14-hour commercial fishing period beginning at 7:00 am and ending at 9:00 pm** on Wednesday, August 8. **Waters inside the Bettles Bay, Hummer Bay and Pigot Bay Salmon Harvest Task Force (SHTF) Markers will be closed for this fishing period.** The commercial harvest estimate from the 14-hour period on Sunday, August 5 is approximately 69,200 pink salmon with 120 deliveries reported. Harvest estimates for the August 6 fishery were not available at the time of this news release.

**EASTERN DISTRICT:** Waters of the Eastern District, south of a line from Entrance Point to Potato Point, will open to commercial fishing for a **14-hour commercial fishing period beginning at 7:00 am and ending at 9:00 pm** on Wednesday, August 8. **Waters inside of the SHTF Markers in Sawmill Bay and Jack Bay will be closed for this fishing period.** The commercial harvest estimate from the 14-hour period on Sunday, August 5 is approximately 58,900 pink and 10,300 chum salmon with 13 deliveries reported. The preliminary commercial harvest estimate from the 14-hour period on Monday, August 6 is approximately 11,000 pink and 2,500 chum salmon with 4 deliveries reported.

**MONTAGUE DISTRICT:** Waters of the Montague District will open to commercial fishing for a **14-hour commercial fishing period beginning at 7:00 am and ending at 9:00 pm** on Wednesday, August 8. Harvest numbers for the commercial fishing period on Sunday, August 5 are confidential. There was no reported harvest for the commercial fishing period on Monday, August 6.

**NORTHERN DISTRICT:** Waters of the Northern District, excluding waters of the CCH THA and SHA, will open to commercial fishing for a **14-hour commercial fishing period beginning at 7:00 am and ending at 9:00 pm** on Wednesday, August 8. **Waters inside of all SHTF markers in the Northern District will be closed for this fishing period.** The commercial harvest estimate from the 14-hour period on Sunday, August 5 is approximately 750,000 pink salmon with 124 deliveries reported. The preliminary commercial harvest estimate from the 14-hour period on Monday, August 6 is approximately 254,500 pink salmon with 54 deliveries reported.

ADF&G otolith contribution estimates are now available for the Northern District CPF opener on Saturday, August 4. Preliminary estimates result in a harvest composition of 96% hatchery and 4% wild stock pink salmon, with a wild stock harvest estimate of approximately 45,800 pink salmon. Of the estimated 1,054,200 hatchery fish harvested on this same date, the hatchery composition is as follows: 98% Cannery Creek Hatchery and 2% Wally Noerenberg Hatchery.

**NORTHWESTERN DISTRICT:** Waters of the Northwestern District will open to commercial fishing for a **14-hour commercial fishing period beginning at 7:00 am and ending at 9:00 pm** on Wednesday, August 8. No harvests have been reported thus far during the 2012 fishing season.

**SOUTHEASTERN DISTRICT:** Waters of the Southeastern District will open to commercial fishing for a **14-hour commercial fishing period beginning at 7:00 am and ending at 9:00 pm** on Wednesday, August 8. There was no reported harvest for the recent fishing periods.

**SOUTHWESTERN DISTRICT:** Waters of the Southwestern District east of Point Helen, waters within 1 nautical mile of Latouche Island east of Pt. Grace and east of the southern tip of the Latouche Island, waters of the Port San Juan Subdistrict, waters of the Elrington Subdistrict and waters of the AFK hatchery THA will open to commercial fishing for a **14-hour commercial fishing period beginning at 7:00 am and ending at 9:00 pm** on Wednesday, August 8. **Waters of the AFK SHA will be closed during this fishing period** at PWSAC's recommendation. The commercial harvest estimate from the 14-hour period on Sunday, August 5 is approximately 386,700 pink salmon with 62 deliveries reported. Harvest estimates for the August 6 fishery were not available at the time of this news release.

ADF&G otolith contribution estimates are now available for the Southwestern District CPF opener on Saturday, August 4. Preliminary estimates result in a harvest composition of 97% hatchery and 3% wild stock pink salmon, with a wild stock harvest estimate of approximately 16,000 pink salmon. Of the estimated 530,000 hatchery fish harvested on this same date, the hatchery composition is as follows: 85% Armin F. Koernig Hatchery, 9% Cannery Creek Hatchery and 6% Wally Noerenberg Hatchery.

As a reminder, **all salmon that are harvested but not sold by commercial permit holders in Alaska waters must be reported on a fish ticket at the time of landing** (5AAC 39.130(c)(10)). Fish tickets have a "not sold/personal use" field to report these salmon.

**The next scheduled salmon fisheries announcement is anticipated to be at 2:00 pm Wednesday, August 8.** Permit holders are advised that unscheduled announcements based on current escapement data may occur at any time inseason.

Announcement recordings are available for **gillnet fisheries at 907-424-7535 and seine fisheries at 907-424-7345. In addition, announcement recordings are available in Anchorage at 267-2843.**

Additionally, announcements, inseason harvest data, and escapement data are available at the following web addresses:  
<http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareacopperriver.main> (Copper River homepage) or  
<http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareapws.main> (Prince William Sound homepage).

Unless otherwise specified, all openings are clock openings based on Alaska Daylight Time, which is based on Coordinated Universal Time and may be obtained by calling 303-499-7111.

The department encourages commercial permit holders to renew their licenses early and to check their CFEC vessel registration stickers to make sure that they are current.

The department also encourages permit holders to report observed violations to Wildlife Safeguard at 800-478-3377. Reports are anonymous and cash rewards may be paid for successful prosecution of violations.

PWS commercial fishers are reminded that area fisheries often necessitate fishing in close proximity to marine mammals. Under the Marine Mammals Protection Act (MMPA), the PWS drift gillnet fishery is classified as a Category II fishery. Participants in Category I and II fisheries must be registered in the Marine Mammal Avoidance Program (MMAP) to be authorized for lawful incidental, but not intentional, marine mammal takes during fishing. However, this authorization explicitly does **not** exempt holders of commercial fishing permits from the MMPA prohibition on takes of marine mammals listed as endangered or threatened under the Endangered Species Act. As a participant in the PWS drift gillnet fishery you are automatically registered in the Marine Mammal Authorization Program (MMAP) by the National Marine Fisheries Service (NMFS). As a participant in a Category II fishery, you must:

- Maintain an MMAP Authorization Certificate, or a photocopy, on board the vessel while engaging in any of the fisheries identified on the reverse side of the certificate. For non-vessel or set net fisheries, the enclosed Certificate, or a photocopy, must be in the possession of the permit holder during fishing operations. This Certificate, in combination with a current, valid state or Federal fishing permit, will serve as your authorization to incidentally take non-endangered or non-threatened marine mammals in the course of commercial fishing operations.
- Report all injuries and mortalities of marine mammals within 48 hours of returning from the trip during which these takes occurred using the MMAP Mortality/Injury Reporting Form (visit [http://www.nmfs.noaa.gov/pr/pdfs/interactions/mmap\\_reporting\\_form.pdf](http://www.nmfs.noaa.gov/pr/pdfs/interactions/mmap_reporting_form.pdf) for a copy).
- If so requested, take an observer aboard your vessel.

Purse seine and set gillnet gear are classified as a category III fisheries under the MMPA. Category III fishery participants are automatically exempted from the incidental take prohibition in the MMPA. Therefore, you do not need to maintain the MMAP certificate aboard your vessel, but must report any incidental takes of marine mammals within 48 hours of the incident or your return to port. Such reports must be made on the Marine Mammals Authorization Program Mortality/Injury Reporting Form.

Because some marine mammals are also listed under the Endangered Species Act, incidental takes are also regulated under that act and are not authorized. **All MMPA category fisheries are liable for incidentally taking ESA listed species.**

Please reference [http://www.nmfs.noaa.gov/pr/pdfs/esa\\_factsheet.pdf](http://www.nmfs.noaa.gov/pr/pdfs/esa_factsheet.pdf) for a list of marine mammals currently listed under the ESA (you should periodically check with the National Marine Fisheries Service for any changes in listed species). Under the ESA, take means to "harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct." 16U.S.C. 1532(19); and harass means an "intentional or negligent act or omission which creates the likelihood of injury to the wildlife by annoying it to such an extent as to significantly disrupt normal behavioral patterns which include, but are not limited to, breeding, feeding, or sheltering." (50 C.F.R. 17.3).

To reduce the possibility of incidentally taking an ESA listed species and its associated liability ADF&G recommends that:

- Fishermen participating in area fisheries remain vigilant in monitoring gear when marine mammals may be present.
- Fishermen use avoidance measures (e.g., not fishing or relocating fishing activities when marine mammals are present or likely to be present) to minimize interactions with marine mammals.
- Avoid fishing in areas where marine mammals are likely to be present at night or when visibility or weather conditions make it difficult to spot marine mammals.

For further questions concerning marine mammal regulations call NMFS at 907-271-5006.
